

# Dietary Supplement Certification

Products must complete a four-step process to achieve Informed Choice certification

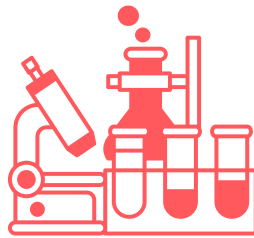

## Manufacturing Facility & Ingredient Analysis

A thorough paper based assessment reviews quality systems and raw materials

**Step 1**

## Laboratory Sample Testing

Three product samples are tested and must not show banned substance contamination

**Step 2**

## Certification Approved

The product is officially certified. It is listed on the website and can carry the Informed Choice logo

**Step 3**

## Continued Blind Sample Testing

The product is tested through random monthly blind samples to ensure integrity and quality.

**Step 4**
